New MVTec Academy makes entry into machine vision easier

- **Digital learning offering to get to know MVTec products and technologies**
- **Practical training directly from the software manufacturer**
- **State-of-the-art e-learning platform for best possible learning success**

Munich, June 14, 2023 – MVTec Software GmbH (www.mvtec.com), a leading international software manufacturer for machine vision, is expanding its existing training portfolio with the founding of the MVTec Academy, starting on June 13, 2023. The training program, which is built on a state-of-the-art e-learning platform, will initially be geared towards new MVTec customers and interested parties. It will provide a thorough introduction to using MVTec's products and technologies. With the successive expansion of the course program, more experienced users will also benefit from the more advanced and focused learning opportunities in the future.

"With our new and modern e-learning platform, customers receive the best possible training offering, enabling them to quickly unlock the full potential of our powerful products. At the same time, we see the MVTec Academy as an extension of our existing training formats, with the goal of engaging in even closer exchange with our customers," comments Mario Bohnacker, Head of Customer Service at MVTec and responsible for the Academy and the launch of the new course offering.

E-learning platform enables individual learning

The new program makes it easier for customers to get started with MVTec's comprehensive machine vision technologies with hands-on courses created specifically by MVTec experts. Since the courses are flexible, digital, and available 24/7, course participants can access content at their own learning pace. In this initial phase, courses are available in English. Interested individuals can obtain more information about the MVTec Academy and access the courses on the MVTec website at www.mvtec.com/academy.

About MVTec Software GmbH

MVTec is a leading manufacturer of standard software for machine vision. MVTec products are used in all demanding areas of imaging: semiconductor industry, surface inspection, automatic optical inspection systems, quality control, metrology, as well as medicine and surveillance. By providing modern technologies such as 3D vision, deep learning, and embedded vision, software by MVTec also enables new automation solutions for the Industrial Internet of Things aka Industry 4.0. With locations in Germany, the USA, France and China, as well as an established network of international distributors, MVTec is represented in more than 35 countries worldwide. www.mvtec.com
