Professional Embedded Vision Software by MVTec

INITIAL PURCHASE OF MACHINE VISION (MV) SOFTWARE

- State-of-the-art features for robust and fast results
- Free feasibility studies from machine vision experts
- Regular and reliable release cycle, ensuring the right feature set for every user

BUILDING SOFTWARE KNOW HOW

- MVTec provides trainings tailored to its customers' skill set
- An extensive partner network guarantees local contacts worldwide
- Comprehensive documentation helps getting started
- MVTec regularly publishes scientific articles and papers about current machine vision topics

DEVELOPMENT OF VISION APPLICATION

- Free technical support
- Knowledge support from partner network
- IDE specialized for vision applications
- Large pool of example applications
- Configuring MERLIC or programming with HALCON: efficient development for every skill level

IMPLEMENTATION OF VISION APPLICATION IN DEVICE

- Wide range of supported platforms, operating systems, and interfaces
- Shorter time to market thanks to rapid prototyping
- Optional customization of MVTec software according to platform requirements
- Flexible licensing methods

ROLL-OUT OF DEVICE BUNDLED WITH MV SOFTWARE

- 20+ years of experience in the machine vision market
- In-house development in Germany
- MVTec protects against patent infringement

MAINTENANCE AND SUPPORT FOR DEVICE

- Long-term support
- Regular maintenance releases based on customer feedback
- Optional extra services like maintenance contracts
- Free technical support
